Cerebellum ^ CANNABIS IS THE Tree of Life

=PwN=

The hidden truth must finally be understood by everyone, thank you.

Discuss...

Why does our cerebellum very closely resemble a 7 pointed cannabis leaf? You can see a fig leaf and coral combination as well.

funky stuff imo, I believe humans evolved from the pot plant/tree of life partially and thats why our Endo-cannabinoid system so closely matches the cannabinoids in the plant. All the depictions and descriptions of the tree of life match a cannabis plant as well. You really cannot deny this fact..simply look at the ancient pictures.

From wiki:

In ancient Armenia, the Tree of Life was a religious symbol and was drawn on walls of fortresses and carved on the armor of warriors. The branches of the tree were equally divided on the right and left sides of the stem, with each branch having one leaf(bud), and one leaf(bud) on the apex of the tree. Servants stood on each side of the tree with one of their hands up as if they are taking care of the tree. (my opinion on the leaf translation is that it was probably flower not leaf since they are describing harvest and all the leaves have fallen off so it's like one bud on each branch and up the middle)

From the bible entry..

"the angel showed me the river of the water of life, as clear as crystal, flowing from the throne of God and of the Lamb down the middle of the great street of the city. On each side of the river stood the tree of life, bearing twelve crops of fruit, yielding its fruit every month. And the leaves of the tree are for the healing of the nations." (Revelation 22:1-2)"

What plant do you know of that grows wild like crazy on riversides..fruits on a monthly cycle, and has amazing healing qualities. hmmm are we all asleep? historians and scholars will not even go there..but these are the facts. We actually outlawed the historical..biblical Tree of Life or at least a very close relative of it. Can you imagine that...

Look at all the things this plant is indicated as being able to treat.. because our whole body is regulated by our Endo-cannabinoids and pot just happens to be the only plant to have all the ones we need.

[\[link to medicalmarijuanadoctors.org\]](http://link.to/medicalmarijuanadoctors.org)

Those damn Rasta's had it right all along...at least that part... with this knowlege go look at all the ancient artifacts and art with a new eye and you will see it everywhere.. and why not even George Washington knew it. I think all the freemasons do.

"Make the most you can of the Indian Hemp seed and sow it everywhere."
- George Washington, U.S. President quote on Hemp

"Hemp is of first necessity to the wealth & protection of the country."
- Thomas Jefferson, U.S. President quote on Hemp

Also in 1936 Entymologist Sula Benet figured out that exodus 30:23 was mistranslated and that the main ingredient was not Sweet Calamus or Fragrant Cane but in fact Kaneh Bos..Cannabis. Jewish scholars accepted her findings but all the rest of the mainstream religious faiths rejected it without any real evidence against.

The very next year in 1937 Andrew Mellon the extremely corrupt secretary of treasury conspired with his son in law Harry Anslinger along with William Randolph Hearst(the king of yellow journalism) and DuPont chemical to make cannabis illegal across the U.S.

Anslinger later pushed for cannabis to be made illegal worldwide with the U.N. single convention narcotics treaty.

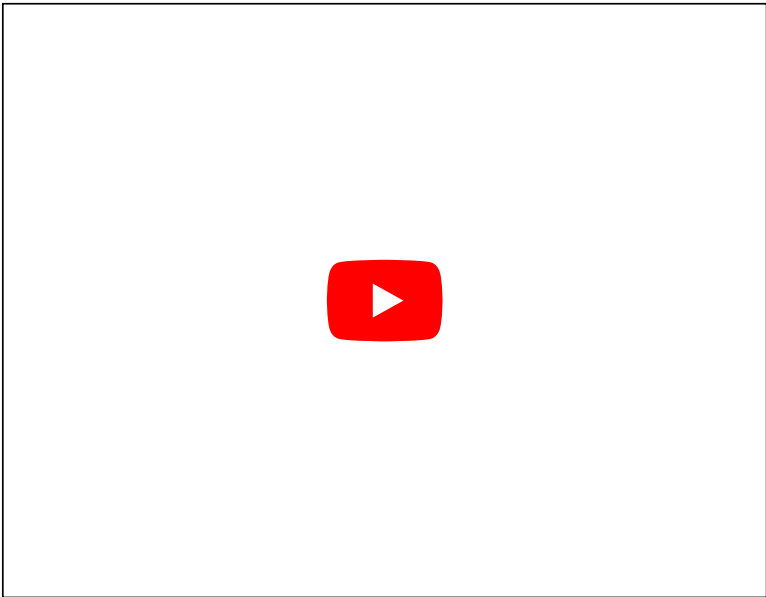

Andrew Mellon also conspired and pushed heavily for fluoride to be introduced to the public drinking water...

This is what fluoride does to your pineal gland over time.

[\[link to www.znakovi-vremena.net\]](http://link.to/www.znakovi-vremena.net)

calcified pineal gland

Pretty wacky causes to take up by a treasury secretary..forced out of office at

Now to get to the really out there ideas..

If in the beginning there was void and since void cannot be stable it explodes creating the symbol or grand schematic of our universe. we know this as the big bang..but what people don't understand is that the big bang could be a gigantic spore print.

first lets look at the typical artist rendition of big bang
[\[link to nothingoutofnothing.files.wordpress.com\]](#)

now lets look at a typical spore print and deduce what we see in it.
[\[link to naturalhistory.uga.edu\]](#)

thus the creation of matter with white overlaying black. white contains the full spectrum of color,sound,dimension..etc. and we know it is of positive polarity dominance.. anti-matter is on the other side of the void.

So think of the universe as one huge spore print schematic..with the alpha and omega contained within it and the image of GoD represented by the Protogonos or DNA...or Trinity. Spores are able to survive in the vacuum of space as well.

you're very welcome, the fact that this not common knowledge speaks volumes honestly. only a complete moron would not see the obvious implications. i'll try and expand on my theory of how we evolved from plant and fungi later. our history and heritage was raped and hidden away from the common man and replaced with a system of death and confusion.

The Egyptian eye (Horus or Ra I think) next to the peneal gland - wow

It is a lot easier to lie when you are the only one who knows the truth than it is to find the truth when all you know is lies.

The pot plant is a subset of the physiological and spiritual make-up of the plant.
 The human brain is more magical than the pot plant.

No, its not. The Pineal gland is NOT at the centre of the brain. There is this misconception that the Pineal gland is the third eye. Its not. The Thalamus is the one that is at the centre of the brain. In fact its plumb centre. The pineal is nowhere near the centre.
