YOU'D BETTER WATCH OUT: THE SURVEILLANCE STATE IS MAKING A LIST, AND YOU'RE ON IT

You'd better watch out—you'd better not pout—you'd better not cry—'cos I'm telling you why: this Christmas, it's the Surveillance State that's making a list and checking it twice, and it won't matter whether you've been bad or good.

You'll be on this list whether you like it or not.

Mass surveillance is the Deep State's version of a "gift" that keeps on giving... back to the Deep State.

Geofencing dragnets. Fusion centers. Smart devices. Behavioral threat assessments. Terror watch lists. Facial recognition. Snitch tip lines. Biometric scanners. Pre-crime. DNA databases. Data mining. Precognitive technology. Contact tracing apps.

What these add up to is a world in which, on any given day, the average person is now monitored, surveilled, spied on and tracked in more than 20 different ways by both government and corporate eyes and ears.

Big Tech wedded to Big Government has become Big Brother.

Every second of every day, the American people are being spied on by a vast network of digital Peeping Toms, electronic eavesdroppers and robotic snoopers.

This creepy new era of government/corporate spying—in which we're being listened to, watched, tracked, followed, mapped, bought, sold and targeted—has been made possible by a global army of techno-tyrants, fusion centers and Peeping Toms.

Consider just a small sampling of the tools being used to track our movements, monitor our spending, and sniff out all the ways in which our thoughts, actions and social circles might land us on the government's naughty list, whether or not you've done anything wrong.

Tracking you based on your phone and movements: Cell phones have become de facto snitches, offering up a steady stream of digital location data on users' movements and travels. For instance, the FBI was able to use geofence data to identify more than 5,000 mobile devices (and their owners) in a 4-acre area around the Capitol on January 6. This latest surveillance tactic could land you in jail for being in the "wrong place and time." Police are also using cell-site simulators to carry out mass surveillance of protests without the need for a warrant. Moreover, federal agents can now employ a number of hacking methods in order to gain access to your computer activities and "see" whatever you're

seeing on your monitor. Malicious hacking software can also be used to remotely activate cameras and microphones, offering another means of glimpsing into the personal business of a target.

Tracking you based on your DNA. DNA technology in the hands of government officials completes our transition to a Surveillance State. If you have the misfortune to leave your DNA traces anywhere a crime has been committed, you've already got a file somewhere in some state or federal database—albeit it may be a file without a name. By accessing your DNA, the government will soon know everything else about you that they don't already know: your family chart, your ancestry, what you look like, your health history, your inclination to follow orders or chart your own course, etc. After all, a DNA print reveals everything about “who we are, where we come from, and who we will be.” It can also be used to predict the physical appearance of potential suspects. It's only a matter of time before the police state's pursuit of criminals expands into genetic profiling and a preemptive hunt for criminals of the future.

Tracking you based on your face: Facial recognition software aims to create a society in which every individual who steps out into public is tracked and recorded as they go about their daily business. Coupled with surveillance cameras that blanket the country, facial recognition technology allows the government and its corporate partners to identify and track someone's movements in real-time. One particularly controversial software program created by Clearview AI has been used by police, the FBI and the Department of Homeland Security to collect photos on social media sites for inclusion in a massive facial recognition database. Similarly, biometric software, which relies on one's unique identifiers (fingerprints, irises, voice prints), is becoming the standard for navigating security lines, as well as bypassing digital locks and gaining access to phones, computers, office buildings, etc. In fact, greater numbers of travelers are opting into programs that rely on their biometrics in order to avoid long waits at airport security. Scientists are also developing lasers that can identify and surveil individuals based on their heartbeats, scent and microbiome.

Isaiah 9:6

For to us a child is born, to us a son is given, and the government will be on his shoulders. And he will be called Wonderful Counselor, Mighty God, Everlasting Father, Prince of Peace.

Isaiah 9:7

Of the increase of his government and peace there shall be no end, upon the throne of David, and upon his kingdom, to order it, and to establish it with judgment and with justice from henceforth even for ever. The zeal of the LORD of hosts will perform this.

Re: YOU'D BETTER WATCH OUT: THE SURVEILLANCE STATE IS MAKING A LIST, AND YOU'RE ON IT

The surveillance state has far surpassed its bounds for a free society and nation. With the coming implementation of the digital dollar and social credit score this new technocracy is the real threat to our freedoms and liberties.

No.

Swear against it under penalty of perjury.

So far you have fully agreed.

You are one of them

Trying to make people fatalistic and scared.

Swear against it under penalty of perjury, or you, and your closest 100 million collaborators, accept execution and annihilation under the laws of tacit consent.

Swear against the pedophilia and child sacrifice accusation under penalty of perjury.

Your posts are worthless deflection and hot air unless it's

under penalty of perjury.

You have absolutely f**k all right to be here.

17 minutes until 10:30pm Taipei time.

Would you swear against the pedophilia and child sacrifice accusation under penalty of perjury?

6 minutes left.

We take it that you fully agree, and fully consent to annihilation.

Seven minutes.

No contest from OP.

Full and enthusiastic agreement under the laws of tacit consent.

Easy there mr. space lawyer i've had no training in the codes and titles of bleep bloop blorp and have never read even a single section of it so im going to have to say I'm incompetent to stand trial for crimes of humanity that i personally have never committed and ask to have all charges against those innocent of such crimes be stricken from such proceedings.

Quoting: **The Future Hegemon**

Is that post under penalty of perjury?

Worthless if it isn't.

What do you mean, training?

The laws are clear:

DO NOT RAPE CHILDREN.

DO NOT SACRIFICE CHILDREN.

It's against the law in the US, and every damn country.

Are you a US citizen?

Then what you are accused of is against the law.

Request denied.

Your response must be under penalty of perjury, or it is worthless.[/b]

2 minutes left.

Your posts are pointless bluffing.

So it stands to reason that there are not enough people to monitor all the info, so it will be passed on to machines to parse. (idiots will call it AI).

Then, the perpetrators will begin to be caught in the nets of deceit as well.

They will be forced to alter the software tp discriminate fully in favor of anyone on the payroll (the one you pay if you work).

This will mean a clear cut line between castes.

Ruling and slave.
