One of my best friends now is a complete recluse. He won't leave the house, has everything delivered. I tried talking to him on the phone recently and told me to contact him on Signal as the phone line wasn't secure?  
Seeing if anyone has similar story.

I've had the shots a year ago.  
  
I feel more rage built up in me ever since.  
  
More anxiety also my muscles and my brain is tensed up.  
  
Also the arm I got the shots in is suddenly extremely sore exactly one year on.  
A deep pain in my bicep like something was implanted. Hurts

every time I move my arm. I need an X-ray to see what's going on

Maybe you were working , my arms are horrible from working for 36 years

Quoting: **Anonymous Coward 84959771**

I haven't worked in a long time or gone to the gym in years but it feels like I'm lifting weights the night before, that type of pain where the muscles tear

I know two people who felt rage after the shots. One went full psycho but later calmed down. The other just freaked out quietly because he is such a calm person. It totally shook him. He knew the booster was the cause.

I used to be more calm and relaxed before the shots too.

Now I feel I'm constantly on edge. I sleep but never get a good rest. I remember every terrifying dream too.

Im definitely more short tempered now, if a bad word is said to me I lash out. Before I used to ignore stuff and let it wash over me.

Strong doses of thyme tea worked for my brain fog I had for 8 months after the shots. The only thing that had any positive effect on me. Not saying it'll work for shaking but maybe it will ease it a bit.

My granddaughter has attempted suicide twice since she took the shot. She was a fairly stable person before the shot, but she went completely batshit crazy afterward.

Damn, I tried to warn her. She and my sister-in-law just ignored the warnings and took the shots. My Sister-in-law had skin cancer which was in remission several years ago but has come back very strongly and just recently was diagnosed with heart problems.

**Re: You guys know anyone who started suffering from mental problems after the shot?**

I don't understand why some feel the need to comment and say argumentative shit about this subject. We are just trying to communicate with each other and find similarities and answers to a major issue affecting people at this very moment. Everyone was lied to and the fucking thing doesn't do what they said it would. Now we have all sorts of effects people are facing and it's terrible. And no,, my friend didn't take it because he's dumb, he took it because the system is so corrupt he had to in order to continue employment with his company. Was it a bad move? Maybe, but I don't blame him for making that choice. All I know is I want my friend back but im scared he won't recover.

Most people I know who took have just been non stop sick.  
 My dad went to the e.r x5 times after it.  
 Guy at work had a siezure after it.  
 And I know about 4 people who died after it.  
 And a few who have been fine.

Almost all of them are constantly sick tho.  
 And I consider all of them to have mental problems for taking it in the first place!

Very sorry to hear that.

Brave of you to admit it, and try and control it.

IMO,

- Barleygrass and other high chlorophyll foods.
- Turpentine.
- High dose Vitamin C.
- Iodine.
- Zeolites.

All of these can help detox. I'd rate Barleygrass and chlorophyll as the best detoxer.
