A message from Pandora's Box

I am sorry for my lack of presence. We have had some complication lately that I cannot relay. However, not to cause alarm but I can tell you this now.

The budget deal will not happen and the US Gov will default. The impact will not be immediate as many people think.

However this is the beginning of major economic disruptions which in mid december. China, Russia and UK will be trying to make the Yuan the main reserve currency. From history we learnt that this was in the works for 6 yrs.

In mid december (I will not give exact date) a major crash will occur in the DOW - will drop thousands of points and the dollar will be called worthless unanimously internationally. We will have as few allies like Australia and Germany...

ON January 1st 2014 the dollar will be trading at 10% to 20% of other major currencies. You can guess what happens to inflation.

DO NOT PANIC - Societal structure remains intact mostly except in big cities where although gov benefits remain they are a fraction of their value and riots will happen in some major cities. Yes Martial law will be declared in those areas but not nationwide.

This does cause major issues with the US populace causing further economic decline.

The Euro crashes next and a push for not a 1 world currency but standard of trade with the IMF being the main player, it will operate as a type of federal reserve for the planet.

Ison - will be bright in the sky but will not cause problems.

Nobody will be revealed in March 2015 (atm he is no longer posting on GLP actively).

**Re: A message from Pandora's Box**

I will be glad to answer any questions. Please remember that my policy on some specifics is the same. It is for your benefit and our futures.

Today I have provided information so many of you have your fears calmed.

This is not the end but is the beginning of massive changes with world governments.

I see many speaking about false flags. From now till about 2017 there are none -

I do have one warning to be aware of. In 2016 a newly formed government entity will succeed to place major information controls on the internet.

This causes outrage but violating to seeking work arounds becomes a felony. When this happens many lose hope but a "mew" type of Hybenet emerges that no gov can control.

LOL. Wrong. He has only just begun to post. All before him were just doing their part as planned. Playing the role before him. He is here now. I was thinking March of next year as well. The Feast of St. Joseph this year was key. It may be next year as well. Possibly though it will coincide with the Christmas/new years timing of ISON. No one knows for sure, not even Pandora, not even Nobody.

Financial Doom? Pretty good take.

Ison? I agree as it is in the role of savior this time around. I agree the effects will be minimal. There will be chaos and destruction but minimal. Certain things will be removed, cleansed. Humans will survive.

It is not doom, no major war breaks out.

The one thing about your future I said that should be npost alarming and I may have said to much. The IMF will become a type of currency reserve (this is a consolidation) Think of Euor but globally and more chaotic.

I also see many posts about Ison - it will barely make it past the sun and be a blip in the sky. If I remember correctly even the Domsayers will fizzle as they see it is nothing major.

No,

in 2018 a new composit fabirc will be created. Cheeper and stronger than cotten. Many object cause of health concerns with some chemicals. However, the cost and effeiciency of production makes it become the most popular clothing material.

The Gov. develops it and it does not originate from the US territoties.

Over the last few years I have had to be cryptic. "Nobody" has to emerge on his own. We have tried in intercept before and it always fails. So much about your and our present world is the results of centuries of posturing and decisions..It is not possible to change the future except to only mess it up and risk your and your families own existence. So it is not pursued.
