You misunderstood my comment, or I phrased it poorly.

Many "scientists" claim 75% of our DNA is junk. I disagree.

If they do indeed believe 75% of our DNA is junk, I wonder how many of them would be willing to have their "junk" DNA removed to prove their hypothesis is correct?

Quoting: **Anonymous Coward 84928290**

Ok so what would you do? Do you think its wise to be tinkering with what makes us what we are? Are you an advocate of the transhuman agenda, because no matter if its brain chips or dna manipulation they are both pathways to the same destination.

It references both the original paradise and that which is yet to come (unlocking).

Re: Not only our Cerebral capacity has been locked at 10% our DNA too at 25%

What a fucking retard.

No, we use our whole brain. Maybe 10 percent at a time because there is no reason to use the math part when you are using the "sucking on your mothers cunt" part like OP.

Also, we use all our DNA. Junk DNA is bullshit. Certain portions of DNA are only expressed when needed. The 25% is the portion that builds proteins, the rest is active as needed and for control of replicating etc.

Now, get boosted and die. You are not needed on this planet.

Now ask yourself, why India?

Buddhism is one of the world's largest religions and originated 2,500 years ago in India. Buddhists believe that the human life is one of suffering, and that meditation, spiritual and physical labor, and good behavior are the ways to achieve enlightenment, or nirvana.

You have to raise your personal vibration.

Takes about a week.

Vitamin C in large doses (beware you can OD on Vitamin C)
Selenium.
4 hours sleep a night only.

The problem is is opens psychic powers and connections and if you are not trained.....

Your third eye wide open without any control over it because you have never used it before etc.

The junk DNA is a record. Nothing more nothing less.

Wrong, if we were running at 100% we all be walking Savants.

Brain Gain: A Person Can Instantly Blossom into a Savant--and No One Knows Why
Some people suddenly become accomplished artists or musicians with no previous interest or training. **Is it possible innate genius lies dormant within everyone?**

Savant syndrome comes in different forms. In congenital savant syndrome the extraordinary savant ability surfaces in early childhood. In acquired savant syndrome astonishing new abilities, typically in music, art or mathematics, appear unexpectedly in ordinary persons after a head injury, stroke or other central nervous system (CNS) incident where no such abilities or interests were present pre-incident.

But in sudden savant syndrome an ordinary person with no such prior interest or ability and no precipitating injury or other CNS incident has an unanticipated, spontaneous epiphanylike moment where the rules and intricacies of music, art or mathematics, for example, are experienced and revealed, producing almost instantaneous giftedness and ability in the affected area of skill sets. Because there is no underlying disability such as that which occurs in congenital or acquired savant syndromes, technically sudden savant syndrome would be better termed sudden genius

No doubt you are correct in theory. By why does your working lead you to a chip as the only answer?

The main issues are: It's invasive, and irreversible.

If Elon's tech is so good (he seems to have a good brain) he can build a resonance device that hooks up to your temples/cerebellum/amygdala, and lets you experience godlike powers for a couple of hours.

Even if people did want to wear something 24 hours a day, it should be detachable, resonant, and non-invasive. Like a headband which can be taken off at any moment.

Researching along those lines might bear amazing fruit.

What awesome technology do they have in Telos, Shasta, for example?

~O~

The public won't take to the chip. It'll bomb like Google Glass.

Once Elon gets rid of his handlers, he could bring true healing to the world.

I bet they have devices 100x better than the Flanagan Neurophone in the basement, in Skunkworks, in the hidden towns.

If he doesn't want that job, there are dozens who could do it instead.

The door is open. The tare train is leaving the station.

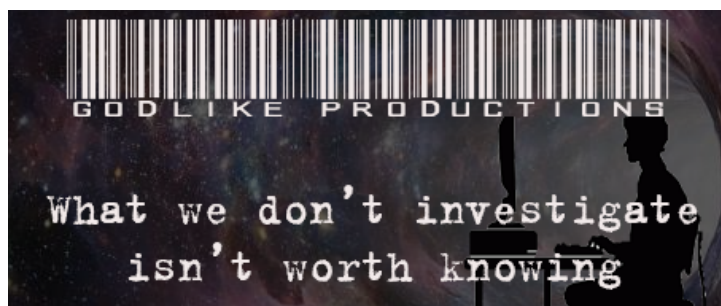

The Great Separation is here.
