Earth isn't flat but its much la	arger than we're being told
Anonymous Coward User ID: 81516015	Earth isn't flat but its much larger than we're being told
<ul><li>United States</li><li>11/25/2022 03:39 PM</li></ul>	Its a sphere but its likely 100s even 1000s times bigger than we're being told.
Report Abusive Post Report Copyright Violation	That's why it "appears" to be flat. Think of a small section on a really large ball, for all intents and purposes its flat.
	Basically we're living in a Truman show style area surrounded by ice on much much larger planet Earth then we're been told.
	Its basically an experiment.

I know what your saying its like a flat earth map on a bigger scale planet. And our melted circle faces toward the sun.

Our moon faces one direction and spins so the earth could be doing the same . Ive mentioned this many times here

United States 11/25/2022 05:24 PM Report Abusive Post Report Copyright Violation	My best friend from middle school has been flying for a major airline for over 35 years. He is a captain and will be forced to retire in roughly 3 years. 65 is the age limit. We are both 62 and we chat occasionally on FB messenger. It's a running joke he knows the earth is flat but none of them will ever go on the record.
