The Aliens have asked us to build an ERP, An Enterprise Resource Planner. This is Christ's work.

> Aliens? Like greys…asked you to build ERP and you believed them?
>
> stop 😆
>
> Quoting: **M. Guinefort**

Greys, Is the *chuckle*. I retired in 2015, I have had almost a good solid 10 years to hear these plans and come to their conclusion, the proof that my post is the 47th thread on the forum it was posted on is also Divine, as I am the Number 47. You've been sold on a Hollywood driven collective consciousness delusion, the real aliens are humans, at least nowadays.

There are many English-speaking or Thinking observers external to the Growing Block Universe which are partaking in all of our relations.

Believe it or not, Its your choice.
Be wise.

Quoting: **47 84689167**

Et phone home. Ouchh

Maybe - maybe the 47 committee rebrand the term "Alien" so dumbass programmed bots like me get all confused

Re: The Aliens have asked us to build an ERP, An Enterprise Resource Planner. This is Christ's work.

Do not believe anything with seven batshit crazy unclean spirits partying inside them.

First the earth must be cleansed of unclean spirits and the only way to do that is..

In that day, there will be a fountain open to the house of David [in England] and to the inhabitants of Jerusalem, for the washing of the transgressor and of the defiled woman.

*And this shall be in that day, says [Sabaoth] the Lord of hosts: I will disperse the names of the idols from the earth, and they will not be remembered any longer. **And I will take away the false prophets and the unclean spirit from the earth.** - Zechariah 13:1-2*

🙂

The words of a whisperer seem simple, but they penetrate to the innermost parts of the self.

In the same manner as an earthen vessel, if it were adorned with impure silver, conceited lips are allied with a wicked heart.

An enemy is known by his lips, though it is from his heart that he draws out deceit.

***When he will have lowered his voice, do not believe him, for there are seven vices in his heart** [spirit].*

Whoever covers hatred with deceit, his malice shall be revealed in the assembly.

Whoever digs a pit will fall into it. And whoever rolls a stone, it will roll back to him.

A false tongue does not love truth. And a slippery mouth works ruin. - Proverbs 26:22-28

Quoting: **7 of 9 84689167**

Last I asked, the PR Front Runners are Maya Bijou, and The Krankies. But I'm sure you could make the team...

People are raising understandable concerns... good that we have an interesting discussion here.

Think of what it would be like if Uber and AirBnB reached out to a Mennonite community, and tried to 'help'. That could be awesome, or a total nightmare. That's basically what's happening on a planetary scale now, with Earth and the Observing Groups.

As OP has noted, the race is on to build BETTER software than is currently in use in the wider Galaxy.

I'm on this thread because I want to upgrade the systems. As you can see from the comments, we are all very worried about being assimilated into some dysfunctional collective.

Now, OP.

You have seen the grand vision, but the devil is in the details. The system you talk about could liberate trillions of beings, or enslave them, depending on how it is implemented.

Do you have a Repo, Readme, UI mockups, user-stories, some codepens..? Even hand drawn UI sketches would work. Programmers can figure out A LOT from user stories and a UI design.

~O~

I'm building a system here. Anyone is welcome to take a look.

www.github.com/morning******star****88/x

Remove the stars (my github user account is banned on GLP), and check it out, if you wish.

~O~

For anyone who is skeptical...

What kind of software would you need to make your life better?

I would be more than happy if this planet ascended right now, but if we remain stuck in physicality, we have to use some kind of software... for now... at least.

Re: The Aliens have asked us to build an ERP, An Enterprise Resource Planner. This is Christ's work.

Random Precepts of Programming I

1) If we remain stuck in physicality, and the reader wishes to get into any kind of tech work.... codepen and github are a good start.

Codepen is a true treasure trove. They were acquired by Google for an undisclosed sum a few years back.

For Github, first skills are:

-**learning GFM/markdown**, and
-**how to write and fork a decent readme.**
-If your readme looks good, money is more likely to flow.

~O~

Check out Vue's readme, for example... Last I checked, Evan was making 14 grand a month... maybe even more.

It's not easy to get to that level, at all. He probably coded for free for years.

Most open source projects make zero money... cos they don't have their PR act together.

Its' OK to work in tech and not be a programmer. But marketers/UI/UX/sales/PR people make themselves 5x more hire-able if they know GFM/HTML/CSS.

~O~
~O~
~O~

2) If you stick to a browser heavy application, OP, you will massively reduce costs, and be able to outmaneuver bloated and slow competitors.

If you worked in corporate ERP, I think you must have seen the huge waste that can occur serverside. Incompetent, or downright malevolent, sysadmins BS management that they need X equipment and this budget... and basically subtly hold the company to ransom...

We just saw how Elon canned a ton of useless icon designers, and Twitter is flying just fine with staff reduced by 50 to 90%. FB did the same. Big tech limpets are being purged, they totally deserve it.

Stick mainly in the browser, and stay open source, and a ton of payroll/server-bill headaches disappear. Like Linus Torvalds, pour excellence and brainpower into a clear, scalable, well documented, small system, and let others run their own server. He's happy as Larry, and rich as can be. Still codes from his attic, IIRC.

~O~

3) Obviously you want some kind of server code... I'd go looking on github for **Lightweight ERP micro framework** and maybe fork a stable, popular project.

IMO, the system needs to run on a fresh 5-dollar Digital Ocean or Linode install, with a popular Linux distro like Ubuntu or Debian. There needs to be a clear readme, with 10-15 bash commands, that people can run, to feel the rush of setting up their own server. The key is to standardize, and help people set up on low-cost droplets, so you don't get beginners with a ton of environment conflicts, on old versions of Windows, for example. That can be painful to fix, and massively reduces adoption.

Using Erlang or Phoenix/Elixir may substantially reduce server bills. IIRC, Bleacher Report cut costs dramatically by switching to Elixir. One of the reasons What's App was acquired for billions, was because they were serving 400 million messages per day, with only 11 engineers. That should make anyone's eyes pop. They did this cos they ran on the Erlang BEAM.

One of the reasons Twitter, FB and other big tech companies have so many staff, is because they violated, or wait, **proved,** Virding's First Rule of Programming.

tl:dr

1) Codepen and Github for tech beginners.
2) Pursue excellence in the browser first.
3) Try Erlang.

No rush to get back to me, I'm communicating with the whole McGalaxy here.

Great post,
I just finished reading it now; Making some sweeping changes to my Original Post, as I write and alter the arrangement of atoms all around me, according to plan.

I have to thank you for going into detail about this, I will be sharing some of this post with my friend in hopes of fine-tuning my understanding even more, Thank you.

This is helpful for anyone who wants to get started, to help. I promise these plans were from the highest points of existence. There is lots of work available.
I am going to translate this into a brainstorm plot, In hopes of giving people a visual demonstration of a workable system.

Be wise.

Re: The Aliens have asked us to build an ERP, An Enterprise Resource Planner. This is Christ's work.

G'Morning OP.

Must be cold in Edmonton. Your post about that city being a hub was interesting.

You mention "The Aliens"... are you able to name any groups? Sometimes people hold back, because they think "Earthers are not ready for specifics"... but I think we're long past ready.

Obviously, many posters are worried about this planet being overrun by the more manipulative races. But we know there are benevolents out there.

I was wondering if you've cooperated with any of the Abraxas Dynasty, specifically Kalique or Titus... Blim-Blim is a rather willful boy... but I hear good things about Kalique. I have some interesting stories on the ground here.

Maybe we can lay off the Earth software talk for a few hours, and talk about the wider universe.

I'm specifically interested in how their systems have failed. I heard Ready Player One depicted their society. Any comments?

Anyone is welcome to talk about life outside the stage world...

Happy Friday Everyone,

Doozle.

❤️🌼

Re: The Aliens have asked us to build an ERP, An Enterprise Resource Planner. This is Christ's work.

Hello All,
I have returned from a temporary Ban to this forum, I am not sure what I posted which triggered the ban, probably something related to bearing Christ Consciousness, or speaking of the Anomaly.

I wish to continue this thread, and I will respond to any missed messages or new ones. I have been thinking more about this lately and there's a couple ideas that need more brainstorming, such as, Digital Credit based currency, based on contributions in the form of being useful and leading us in the direction of a technological singularity.

Thank you all for your thoughts so far, in this journey the only destination is the journey and as this plan evolves, and we implement it, All of our relations will start to balance out with the ebb and flow of the Universe, which is entangled with me.

I love you all.

Hello,
I cannot sleep. It is very cold outside, -30C, Inside it is 65F - My cat won't even go out for 5 minutes, though she gets overly bored and tries to ask to go out once a day or so for a few minutes.

I would like to address your question and also discuss the greater Universe at large, You spoke about groups, I would like to say that I am a Ground member of the Ashtar Command. (Yes that.) There is a real Ashtar Command and then all the fake lunacy and often stupid channeled material you hear of them on YouTube and etc, which is not real.

If you would like to learn more of this I am sure they would be happy to discuss details, with us. And I will post more information here about how all of that came to be. I may goto Reddit where I made a very detailed post about my sighting and copy/paste it into this thread, but for now I will leave it at this.

Are you still awake?
How has your sleeping been? I have not been able to sleep more than 30 minutes to an hour in duration, I believe I have been "Called", and am facing south in my bedroom, watching the 96 ST Churches from a vantage point down the street from it. "My Flock", Lol. Well, it could be true you know.

I feel like I am gloating but the Universe has allowed for it at this time.
I want to thank you all for your continued aid in the Collective Consciousness pursuits and healing process. Things have indeed been intense since the large Gamma Ray Burst arrived to Earth on October 9th, as well as recent Black Hole discharges which have been observed to be facing the Earth Direction.

Never-mind the fact there exists an Interesting NASA Scientist who believes there could be a small micro-black hole that exists under the Earth's surface, in the inner-iron Crystallized (Hexagon) core.

LOVE is Unity, It means Limitless Oscillating Vibration Energy. Remember this always.

We are one.
Be wise.

I always sleep just fine.

I could sleep through a nuclear war.

I slept through an electric storm when I was a kid.

I often sleep through earthquakes...

There must be something to the Black Hole mystery. Black holes in the heart of the planet. In the heart of the universe. In every atom... in our eyes...

December Solstice, Earth lines up with Galactic Center.

If you wanted to hire some freelancers, Im sure you could find some on GLP.

Peace

Reading these lines, I am more and more convinced that when this time comes, it will be a threat to the majority of humanity due to the colossal decline in morals from generation to generation.

All the media of that time will shout with one voice about the danger and this will be one of those moments when they do not lie.

And the actions will be appropriate with the burned cities, billions of dead and a huge fire.

And who will do it? And imagine if it's a staged false flag?

We are losing the light, gentlemen.

Well I for one don't want to be a filthy, fornicating, orgiastic lowlife PAGAN rolling around in the muck that is the dregs of society that are doing what..DRINKING? HUNTING?

Is that even a legal combination? What are we advocating to the kids here.
I support oxen, they pull the wagons of good, strong working Americans that spend all day in the fields then go home and put a meal on their family's plate AND THEY DO NOT WATCH PORN AFTER!

Ok yes I'm here. I mean business. I support local artists and small food chains. I have a plan and the means of seeing it put into action. I can get government funding, a federal backing and give every agent their own briefcase with a 4 number key code.
This is about importance not porn.

You could use Crypto to bring in off-world energy to Earth's eco-system.

Abraxas-Aether...

- The smartphone tracking aspects of crypto are dangerous.

- The be your own bank aspect is phenomenal.

The key is to separate those two polarized aspects.

~O~

Regarding scale. Get it working for 100 people, then scale locally using Github. A README can be forked in one click.

As long as you can exchange the crypto token for a new coin off the bat, it will immediately be interchangeable with pre-existing fiat.

Not easy, but these problems have been solved.

Well I for one don't want to be a filthy, fornicating, orgiastic lowlife PAGAN rolling around in the muck that is the dregs of society that are doing what..DRINKING? HUNTING?

Is that even a legal combination? What are we advocating to the kids here.
I support oxen, they pull the wagons of good, strong working Americans that spend all day in the fields then go home and put a meal on their family's plate AND THEY DO NOT WATCH PORN AFTER!

Ok yes I'm here. I mean business. I support local artists and small food chains. I have a plan and the means of seeing it put into action. I can get government funding, a federal backing and give every agent their own briefcase with a 4 number key code.
This is about importance not porn.
~team USA

Look at all these 8s and you will know I'm the real deal.

I was thinking the same thing.

Drinking wine on the back of an Ox, and hunting for food.

What better way to spend an afternoon?
